## PROFESSIONAL SUMMARY

---

Frontend Developer with 2+ years of experience building scalable web applications using **React.js, TypeScript, and modular component architecture**. Specialized in performance optimization, achieving up to 90% reduction in endpoint calls through efficient global state management (Zustand, Context API, Redux). Proven track record in agile teams (Scrum), REST API integration, and delivering features with 100% on-time completion. Self-motivated, results-driven, and committed to clean code and best practices.

## CORE COMPETENCIES

---

**Frontend:** React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS, Tailwind CSS, Bootstrap

**State & Architecture:** Redux, Zustand, Context API, Modular Component Architecture, Micro-Frontends

**Backend & APIs:** Node.js, Express, REST APIs, JWT Authentication, WebSockets

**Tools & DevOps:** Git, GitHub, GitLab, Bitbucket, GitHub Actions (CI/CD), Docker, Vite.js, Webpack

**Cloud & Services:** AWS (EC2, Amplify, Cognito), Azure (Container Registry, App Service)

**Methodologies:** Scrum, Jira, Trello, Code Review, Testing

## PROFESSIONAL EXPERIENCE

---

### Frontend Developer

**Exploration & Discovery Technologies** | Remote | March 2024 – November 2025

- Built scalable web applications with Vite.js and React.js, implementing modular component architecture and SCSS modules that improved code maintainability by 40%.
- Optimized global state management with Context API and Zustand, reducing endpoint calls by up to 90% and significantly improving application performance.
- Contributed to technical platform rebranding: dependency updates, deprecated library migration, and adoption of modern React Hooks, resulting in a more scalable and performant application.
- Maintained 100% resolution rate on bugs and support tasks in Jira, contributing to system stability and on-time delivery within 2-week sprints.
- Implemented and integrated REST endpoints for new features, optimizing error handling and validations with Formik and Yup.
- Collaborated in agile Scrum teams, participating in dailies, sprint planning, retrospectives, and code reviews.

### Frontend Developer

**Start-7** | Remote | September 2023 – March 2024

- Developed web applications with React.js, HTML5, CSS3, and JavaScript, creating reusable and scalable components under modular architecture.
- Implemented real-time features with WebSockets (individual and group chat), interactive calendars with FullCalendar, and dynamic forms with Formik and Yup.
- Integrated REST APIs and JWT authentication system, managing global state with Redux and Context API for efficient data flows.
- Optimized performance through lazy loading, memoization, and rendering best practices, enhancing user experience.
- Implemented dynamic navigation with React Router, including protected routes, nested layouts, and URL parameter management.

## EDUCATION

---

### Full Stack Web Developer

**Soy Henry** | Remote | March 2023 – August 2023

Intensive 700-hour bootcamp. Technologies: JavaScript, React, Redux, Node.js, Express, PostgreSQL, Git.

### Full Stack Web Developer

**Programa desde tu casa** | Remote | August 2021 – January 2022

150-hour hands-on theoretical and practical bootcamp in web development.

## PROFESSIONAL DEVELOPMENT

---

- Micro-Frontend: Scalable Web Application Architecture – Udemy (2025)
- TypeScript: Complete Guide and Handbook – Udemy (2025)
- AWS Certified Cloud Practitioner – Udemy (2025)
- React Native & Strapi – Udemy (2025)
- Python – Santander Open Academy & Talento Tech (2025)
- Docker – Udemy (In progress)
- React: The Complete Guide – Udemy (2022)

## LANGUAGES

---

**Spanish:** Native

**English:** B2 – Upper Intermediate (technical reading, professional communication)
